

苦味剂

Bittering Agent

苦味剂是一种添加到产品中以使其闻起来或尝起来苦味的化学物质。苦味剂通常用作厌恶剂，以阻止吸入或摄入有毒有害物质（如甲醇，工业酒精和乙二醇）。在添加于塑胶制品中时，能有效抑制误食和啃咬，是非常有效的儿童、动物（啮齿类和鸟类）阻食剂。

Bitters are chemicals added to products to make them smell or taste bitter. Bitter agents are often used as aversive agents to prevent the inhalation or ingestion of toxic and harmful substances (such as methanol, denatured alcohol and ethylene glycol). When added to plastic products, it can effectively inhibit accidental eating and biting, and is a very effective food inhibitor for children and animals (rodents and birds).

Denatonium Benzoate

CAS No.: 3734-33-6

Specifications: USP

Usage: as bitterant

Package: 25kgs/drum

Denatonium Benzoate Solution

CAS No.: 3734-33-6

2.5%/4% Water Solution or 25% Ethanol Solution

20%/22.5%/25% Ethylene Glycol Solution

25%/40% Propylene Glycol Solution

40% tert-Butanol Solution

Denatonium Saccharide

CAS No.: 90823-38-4

Specifications: $\geq 99.5\%$

Usage: as bitterant

Package: 25kgs/drum

Sucrose Octaacetate

CAS No.: 126-14-7

Specifications: USP

Usage: as bitterant

Package: 25kgs/drum
